

# RF Engineer: RF Engineer III

---

Conducts research, designs, analyzes, evaluates, and tests RF/microwave subassemblies and systems, antennas and power electronics including optical/video subsystems. Performs system integration, verification and validation of complex RF and power systems. Modifies and redesigns existing systems and components to meet new requirements. Designs complex RF, analog and digital CCAs. Supports manufacturing through product testing, troubleshooting and assistance with contract manufacturers

## **Discretion/Latitude**

Works under only general direction. Independently determines and develops approach to solutions. Work is reviewed upon completion for adequacy in meeting objectives.

## **Knowledge, Skills and Abilities**

Complete understanding and wide application of technical principle, theories and concepts in the field. General knowledge of other related disciplines.

## **Problem Solving**

Provides technical solutions to a wide range of difficult problems. Solutions are imaginative, thorough, practicable, and consistent with organization objectives.

## **Impact**

Contributes to the completion of specific programs and projects. Failure to obtain results or erroneous decisions or recommendations would typically result in serious program delays and considerable expenditure of resources.

## **Liaison**

Frequent inter-organizational and outside customer contacts. Represents the organization in providing solutions to technical issues associated with specific projects.

## **Minimum Education and Experience**

5-8+ years with BS in designated Engineering or related field.
