

RF Engineer: RF Engineer IV

Conducts research, designs, analyzes, evaluates, and tests RF/microwave subassemblies and systems, antennas and power electronics including optical/video subsystems. Performs system integration, verification and validation of complex RF and power systems. Modifies and redesigns existing systems and components to meet new requirements. Designs complex RF, analog and digital CCAs. Supports manufacturing through product testing, troubleshooting and assistance with contract manufacturers

Discretion/Latitude

Work is performed without appreciable direction. Exercises some latitude in determining technical objectives of assignment. Completed work is reviewed for desired results.

Knowledge, Skills and Abilities

Applies technical expertise and has detailed knowledge of other related disciplines.

Problem Solving

Develops technical solutions to complex problems that require the regular use of ingenuity and creativity.

Impact

Plans and conducts assignments, generally involving the larger and more important projects or more than one project. Erroneous decisions or recommendations would typically result in failure to achieve major contract objectives.

Liaison

Represents the organization as the technical contact on contracts and projects. Interacts with external personnel on technical matters often requiring coordination between organizations.

Minimum Education and Experience

8-10+ years with BS in designated Engineering or related field.
