Web Development Engineer: Web Development Engineer I

Develops websites and internet applications. Uses web development technologies such as HTML, PHP, Pearl, CGI, JavaScript, AJAX and CSS. Performs various coding and programming tasks, such as design or development of web front-end, back-end web-based applications and web/Internet services. May involve coding and integration of text, graphics, sound and/or video.

Discretion/Latitude
Work is closely supervised. Follows specific, detailed instructions and/or guidance from more senior functional staff.

Knowledge, Skills, & Abilities
Limited use and/or application of basic technical principles, theories and concepts to specific job assignments.

Problem Solving
Develops solutions to routine technical problems of limited scope by following standardized practices and procedures.

Impact
Contributes to the completion of routine technical tasks. Failure to achieve results can normally be overcome without serious effect on schedules and programs.

Liason
Contacts are primarily with immediate supervisor, project leaders, and other professionals in the section or group.

Minimum Education and Experience
0-2+ years with a BS in designated Engineering or a related field.
